

ShopSphere Customer Support Policy

Fictional knowledge-base document created for the ShopSphere AI Data Analyst/RAG academic project. This document is synthetic and should not be treated as a real company policy.

1. Support Channels

Customers may contact ShopSphere through the support portal and other official channels listed in their account. Customers should avoid sharing sensitive credentials.

2. Support Requests

A support request should contain a clear description of the issue and relevant order, subscription, or transaction information when applicable.

3. Priority Handling

Certain subscription tiers or issue categories may receive priority handling according to ShopSphere service procedures.

4. Billing Issues

Payment failures, delayed payments, incorrect charges, and subscription billing questions should be directed to the billing support category.

5. Escalation

If an issue cannot be resolved at the initial support level, it may be escalated to a specialist team. Customers should retain their support reference number.

6. Complaints

Customers may submit a formal complaint when they are dissatisfied with a service decision or unresolved issue. Complaints are reviewed according to internal escalation procedures.

7. Communication

Support personnel should communicate clearly and professionally. Customers should not be asked to disclose passwords, one-time passwords, or complete payment credentials.
